

Cybersecurity: During and Post COVID-19

- Initial focus : Secure Service availability. Align Existing controls
- Going forward: New threats of Phishing and Ransomware requires New Thinking and Awareness
- Management
 - New Definition and Needs of High Availability, Disaster recovery and Business Continuity
 - New Tools and Solutions
 - Frequency of monitoring
 - Response Time
 - Training and Upskilling on new Tools, Processes and Practices
- Cyber Security (A State of Mind too)
 - Being one step ahead : Simulation
 - Follow the tail: Quick response to Vulnerability Management
 - Think Security, and not just follow the guidelines

COVID-19 | Planning & Response
