

# A Framework for Top Management Agenda

## Preparing for Successful Digital Metamorphosis

Going beyond the 'whys' and focus on 'how' organisations need to prepare themselves for the Digital Metamorphosis and transition successfully.

### Revolution

Comprehending the depth and impact of Digital Revolution on respective sector/ industry in terms of market place, work place and social networking space

### Reimagine

While the disruptive impact begins with Technology, the revolution affects the whole enterprise with substantive change in competitive and customer environment, calling for reimagining the strategy covering business drivers and enablers

### Reignite

Reignite the operating model as the engine of the business model, encompassing core work processes, information and decision support systems, governance process, cultural connect and cross functional accountability to deliver customer experience

### Reskilling

The pace and extent of automation will surely change the nature of work, roles and jobs at all levels, requiring reskilling as an integral part of transition

### Readiness

Creating a holistic readiness covering six areas recognizing the need for 'series of transformations' enabling change of the whole and linking strategy to execution
